

## Program 1

Sowmya.D.V.

Write a Shell script to find if the given year is LEAP OR NOT

```
echo "Enter Year :"
```

```
read Y
```

```
year = $Y
```

```
Y = $(($Y % 4))
```

```
if [ $Y -eq 0 ]
```

```
then
```

```
echo "$year is Leap Year!"
```

```
else
```

```
echo "$year is not a Leap Year!"
```

```
fi
```

## Program 2

Date \_\_\_\_\_  
Page \_\_\_\_\_

SHELL SCRIPT TO find the AREA OF CIRCLE.

clear

echo "Enter the radius of the circle"

read r

area=\$(echo "3.14\*\$r\*\$r"|bc)

echo "area of the circle is" "\$area"
